

LA HUIR

The Brand

Lahuir is an independent swimwear brand based in Spain
that celebrates the beauty of simple shapes, with an emphasis
on comfort and quality.

It draws inspiration from summer memories, lazy days
and taking naps in your swimsuit.

Our garments are made in small factories in Portugal and Spain,
maintaining the relaxed pace that inspires us and being
kind to ourselves and the world.

Philosophy & Commitment

At Lahuir, we seek comfort and a return to the essentials.
We design comfortable, functional pieces to wear in and
out of water with high-quality materials.

The essence of Lahuir is to create clothes that go beyond trends,
highlighting well-made and carefully designed items, elevating
simplicity and comfort to the luxury status.

We understand that every fibre has its pros and cons in terms of
environmental impact, and there's no truly sustainable solution.
Therefore, we prefer to focus on responsibility, prioritising responsible
materials with an uncompromising approach to quality and great respect for the production process.

MATERIALS

RECYCLED POLYAMIDE
We selected a polyamide with a soft feel and a cool, pleasant touch against the skin.
Its construction provides a comfortable and breathable sensation.
Polyamide remains a synthetic fibre, but its resilient characteristics
make it ideal for garments that are constantly exposed to water, salt, or chlorine.
We chose the recycled version of this fabric, which includes 51% fibre sourced
from pre-consumer waste.
It holds certifications for both the GLOBAL RECYCLED STANDARD 100 and
OEKO-TEX 100*.

REGENERATED NYLON
We've also chosen premium Italian fabrics made with ECONYL® regenerated nylon by Aquafil.
This high-performance material is breathable, quick-drying, and resistant to pilling,
offering excellent coverage, comfort, and durability — ideal for swimwear built for longevity..

* The ECONYL® Regeneration System starts with rescuing waste otherwise polluting the Earth.That waste is then sorted and cleaned to recover all of the nylon possible. Through a radical regeneration and purification process, the nylon waste is recycled right back to its original purity. That means ECONYL® regenerated nylon is exactly the same as fossil-based nylon. And that nylon has the potential to be recycled infinitely, without ever losing its quality.
* The Global Recyled Standard (GRS) label guarantees recycled materials on all chain of custody with additional environmental and social criteria.
* OEKO-TEX® STANDARD 100 is a label for textiles tested for harmful substances. It sets the benchmark for textile safety, from yarn to finished product. Every item bearing the STANDARD 100 label is certified as having passed safety tests for the presence of harmful substances.
* The Global Organic Textile Standard (GOTS) is the worldwide leading textile processing standard for organic fibres, including ecological and social criteria, backed up by independent certification of the entire textile supply chain. Only textile products that contain a minimum of 70% organic fibers can become GOTS certified
