

Dr. Bloom

from the window

4/1/26

Xx

DR.BLOOM is a team of women spreading art and color through fashion. It is a small family business founded by a mother and her two daughters.

We design dopamine fashion because color has the power to change your mood. We believe in creativity and its ability to shape a better world.

We produce in Europe, taking care of ethics throughout the entire production and sales chain.

Our commitment has always been to build an honest business and to foster long-lasting relationships with both employees and suppliers. We follow a responsible production model based on no overproduction and limited discounting.

We believe in the importance of physical stores, which bring life and personality to the streets of cities and towns. That is why we have grown through our own stores and, more recently, through multibrand retailers.

Deeply fresh and seriously fun :)
From Barcelona to the world since 2013.

◆ AW26 —

I want AI to do my laundry, not my art

AW26 celebrates what is made by hand, what cannot be automated.

With one foot in nostalgia and the other in what we now consider a luxury: unproductive time.

Contemplating a winter landscape, with blue skies, green fields, and cows covered in polka dots.

And my grandmother's freshly made lemon marmalade.

And toasted bread, and pastel-colored checks.

Thinking of ducks parading through the kitchen, among ceramics and games scattered across the floor.

Thinking of everything beautiful, imperfect, and human.

Because it turns out there is something deeply modern about doing things the old way.

So turn on the oven and turn off your phone, winter is served.

Three fluffy yellow ducklings are sitting on a light blue and white patterned blanket. The duckling in the foreground is looking towards the left. The other two are behind it, one looking towards the right and the other looking towards the left. The background is a plain, light-colored surface.
